GLOBAL MOBILE NETWORK
THE CONCEPTS FACTORY

GMN is a concept, not a simple corporate company. We believe in the ideas power. We use them to realize new business models, based on the net opportunity and on the possibilities given by the global mobile market, which allows everyone to build strong relations using the network made of billions of people connected with the most modern telecommunications mobile tools.
OUR BUSINESS CONCEPTS

GLOBAL MOBILE NETWORK
It is the idea of creating ideas to develop successful business, using the net and its power, with no frontiers and no limits.

MULTI VIRTUAL FRANCHISE
To create a network of virtual stores in the internet, able to sell more than one kind of product at the same time, according to the specific local needs: we create the business opportunities and make them available to everyone all over the world. Everyone can choose “if” and “how” to be involved in them, investing on the “idea” he most believes in, or best suits his market needs.
OUR BUSINESS CONCEPTS

WOR(l)D COMMUNICATE
Provide a new way of communicating with innovative tools and eliminate or reduce mobile, national, international and global communication costs.

Use the network’s potential to create an innovative and sustainable online business model that builds profit for the company, partners and consumers.

WOR(l)D TECHNOLOGY
we converge the functionalities and innovations of digital mobile technologies, and new telecommunication frontiers into the most modern personal mobile devices.
